Crawling scroll webpage tutorial:

Step 1: Inspect elements and select **Network** tab.

Step 2: Scroll until the scroll action is called.

Find a link which contains a list of news.

In this case is: https://cafef.vn/timeline/33/trang-3.chn, format: https://cafef.vn/timeline/33/trang-{0}.chn

Step 3: Check other links and get the scroll action link format

https://cafef.vn/timeline/33/trang-3.chn

Code flow:

Get start url data (in this case is https://cafef.vn/vi-mo-dau-tu.chn) → get the highlight news in this page → call the start function with scroll action links → get the news in current page.
